

#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

Introduction

- Bill French was a Staff Accountant in Duo-Products Group.
- He used to report directly to his boss, Wes Davidson(Controller).
- He wanted to do use Break-even analysis for the planning procedures, which was first of its kind for the Duo-Products Group.
- Basically what French had done was to determine the level at which the company must operate in order to break even.
- As he put it,
 1. The company must be able at least to sell a sufficient volume of goods so that it will cover all the variable costs of producing and selling the goods.
 2. Further, it will not make a profit unless it covers the fixed costs as well.
 3. The level of operation at which total costs are just covered is the break-even volume.
 4. This should be the lower limit in the planning.
