Nissan Engineering Standard

NES	Hot Rolled Steel Plates, Sheets and Strips for Automobiles
-----	--

The materials included in this NES (that meet NES M0301 "Automotive Use Restrictions"):

1. SCOPE

(1) The standard specifies hot rolled steel sheets and strips (hereafter referred to as steel sheets, and steel sheets and strips) as well as steel coils (hereafter referred to as steel coils, and coils, respectively) for automobiles manufactured by Nissan.

(2) When sheets of the SP Standard steel apply to the regions where purchase is possible through use and steel manufacturers in Japan and North America approved by Nissan. Further, steel sheets of the SP Standard (only for hot rolled) in the regions where the SP Standard does not apply are classified as a standard allowing continuous use, which there is a high degree of assurance that they will be in compliance with the specifications. (Steel coil manufacturers may not have capability of manufacturing the steel sheets which meet SP Standard. Steel types shall be determined in cooperation with the Purchasing Department.)

The Standard shall be applied to new vehicles using steel types determined at Steel2 revision meetings after October 2000.

2. SPECIFICATIONS AND SYMBOLS OF THE SP SYSTEM

The specifications of steel sheets shall be specified by the following symbol system designating the steel sheet specifications and the steel sheet type. The SP Standard designating specifications for thickness tolerance and SP standard thickness tolerance shall remain unchanged for non-approved manufacturers. The specifications of SP Standard steel sheets shall be designed per the following symbol system designating.
